PROFESSIONAL SUMMARY

Highly motivated Full Stack developer with 2+ years of experience building and maintaining mobile and web-applications using React, Ruby on Rails and Python. Excited to collaborate on innovative projects and applications.

SOFTWARE PROJECTS

E-Commerce App ([Project link](#))

- Built a full-stack web-app that enables users/company to add a list of items that is sold in the premises
- Enable one to check the list of products available by accessing it through the product list page
- Implemented the update and delete functions so as to be able to update the site to have information that is up to date.
- Utilized: React, Laravel, Bootstrap

Currency Tracker ([Project link](#))

- Build a mobile app that allows users to be able to monitor currency shifts from their mobile phones.
- Fetch and display live data and the currency shifts as they occur thus reducing time lag.
- Utilized: React, Redux

To-do list ([Project link](#))

- Created a to-do list so as to enable users to easily keep track of their day-to-day activities.
- Enable user to edit the contents of the to-do list as well as delete is no longer needed.
- Enable user to be able to check the items of the list when done which is indicated by a line drawn across the listed item and afterwards clear them off.
- Utilized: JavaScript

TECHNICAL SKILLS

Software: React, Javascript, Git, PHP, Laravel, Firebase, React Native, Redux, Python (Django), PostgreSQL, RESTful API's, HTML, CSS, MySQL.
